## SUMMARY

Frontend Developer with 4 years of hands-on experience building production React/TypeScript applications for fintech, healthcare, and SaaS products. Strong focus on scalable component architecture, design-to-code workflows, and UI consistency across large codebases. Worked in distributed Agile teams, owning UI features end-to-end — from product requirements to production release. Previous business operations experience strengthens product thinking and ownership in cross-functional teams.

## TECHNICAL SKILLS

- **Frontend:** React (Hooks, Context), TypeScript, Next.js, HTML5, CSS3, Redux Toolkit, RTK Query
- **Styling & UI:** CSS Modules, styled-components, Material UI, Tailwind CSS, Figma, design tokens, responsive layout, accessibility (semantic HTML, keyboard navigation)
- **Backend (working knowledge):** Node.js, Express.js, REST APIs, MongoDB, Strapi
- **Cloud & DevOps:** AWS (EC2, S3, RDS, CloudFront), Docker (basic usage), CI/CD (GitHub Actions)
- **Testing:** Jest, React Testing Library, Playwright (basic), Vitest
- **Architecture & Concepts:** component-based architecture, UI patterns, i18n, JWT-based auth, WebSockets
- **Tools & Workflow:** Git, Agile/Scrum, code reviews, AI-assisted development (ChatGPT, Claude Code, GitHub Copilot)

## PROFESSIONAL EXPERIENCE

### • Frontend Developer • Unidefy | Feb 2025 – Sep 2025 (contract):

**Owned the frontend UI layer of a crypto trading MVP, driving it from early prototype through a production-ready release.**

- Designed and implemented a reusable component system with full theming and user-level customization (React, TypeScript, Material-UI, styled-components, Redux, React Flow).
- Refactored component architecture for reuse and maintainability, fixed critical UI defects, and improved cross-app consistency.
- Built an interactive landing demo-bot to showcase product workflows.
- Worked closely with product and design to align UI decisions with business and UX goals, delivering a customizable UI ready for MVP validation.

### • Fullstack Developer • Freelance & Independent Projects:

- **Designed, implemented, and deployed a production-ready portfolio website for a researcher (HTML, CSS, JavaScript).**
- Built and maintained cloud infrastructure for a fullstack project with PM2 and CI/CD pipelines (AWS: EC2, RDS, S3, CloudFront; CI/CD: GitHub Actions → CodePipeline). Integrated a Strapi CMS backend with a Next.js frontend, delivering automated deployment and stable production data flow.
- Designed and built a personal portfolio hub with multiple sub-projects using Next.js and React, owning architecture, UI system, and project structure. Leveraged AI-assisted development workflows (architecture design, code generation, refactoring) to accelerate delivery and iterate on production-like frontend patterns.
- Participated in developer community projects and technical networking, deepened React and TypeScript expertise through complex UI-focused work.
- Relocated to Israel (Aliyah).

### • Frontend/Fullstack Developer • EPAM Systems | Jan 2022 – Mar 2023:

**Worked on two enterprise-scale projects for global clients in healthcare and beauty retail.**

- Healthcare platform (React, Material-UI): frontend developer in a distributed cross-functional enterprise team (50+ members), focusing on UI features and test infrastructure. Increased test coverage by ~40% by refactoring legacy components and adding unit tests.
- BeautyCare retail system (React, Node.js): fullstack developer, supported and enhanced 8 enterprise web applications. Handled both frontend and backend, including debugging, legacy refactoring, resolving data-flow issues, performance monitoring using Grafana. Collaborated daily with QA, business analysts, design, and client-side engineers in an Agile environment to deliver reliable solutions.

### • Junior Fullstack Developer • UniqTrip | Jan 2021 – Dec 2021 (12 months):

**Joined as a junior fullstack developer and contributed to multiple internal and client-facing products in travel and construction domains.**

- Tour guide app (Node.js): implemented backend API with CRUD services, modules for user authentication, SMS, and payment integrations.
- Accommodation platform (React, Material-UI): implemented UI components and layouts within a React-based frontend team under mentorship.
- Construction analytics dashboard (React, Material-UI, Redux): independently designed and developed a complex scheduling and cost-planning interface combining dynamic data tables and timeline visualization.
- Landing page (HTML, CSS, JavaScript): delivered a responsive marketing landing page for the company's exhibition showcase.

## LANGUAGES

Russian (*Native*), English (*Fluent*), Hebrew (*Basic*)

## EDUCATION

**Frontend Development Program (Corporate Training) • EPAM Systems**

**Economics and Management • Ryazan State University**
